- Software Engineer with 5 years of professional experience and background in Design
- Full-stack web specialist with experience in mobile, cloud, and AI
- I write clean and well-documented code, following good development practices
- Focused on business impact, collaborating with multidisciplinary teams and agile methodologies
- Committed to continuous growth, currently pursuing Computer Science degree

Experience

Software Engineer @ [Lakan.ai](#) | January 2025–Present

- Contributed to the development of the Lakan.ai psychology platform, providing product design expertise and working under tight deadlines.
 - Implemented speech transcription with OpenAI's Whisper, reducing professional typing and assisting with session notes and organization.
 - Helped the team with usability and design challenges, planning and building user flows and improving user experience.
 - Delivered reliable backend solutions for production applications by developing ASP.NET Core APIs and solving complex integration challenges.
 - Enhanced database performance through Microsoft SQL Server optimization, query improvements, and efficient data management.
- Tags: API Development, ASP.NET Core, C#, Microsoft Azure, Microsoft SQL Server, OpenAI Whisper, Product Design, Project Management

Software Engineer @ [Ckreativ](#) | March 2022–December 2024

- Increased sales conversion rates by implementing a design system and improving the UX of the B2B sales application, positively impacting sales professionals across Brazilian states and reducing support tickets.
 - Led the development of an AI chatbot capable of answering natural language queries about historical sales data, assisting supervisors and managers in decision-making.
 - Expanded customer acquisition through integration of a custom Stripe subscription system, simplifying subscription billing.
 - Refined the UX of the Ckreativ ERP platform for companies, ensuring high software quality and enhanced user experience.
 - Contributed to the scalability and maintenance of web and mobile applications, accelerating application response speed and user retention rates.
- Tags: AWS, Bootstrap, Dart, Docker, Figma, Flutter, Git, GitHub Actions, JavaScript, LangChain, Laravel, Material Design System, MongoDB, MySQL, Node.js, Nuxt.js, PHP, Python, Stripe, TailwindCSS, TypeScript, Vite, Vue.js

Technical Content Producer @ [Brick Abode](#) | November 2019–November 2021

- Produced and edited audiovisual materials using NLE software (Adobe Creative Cloud, Blackmagic Davinci Resolve) and managed recording hardware.
 - Developed a production line for over 200 self-recorded job proposal videos, including camera setup, voice capture, chroma key, lighting, and automated editing for YouTube API integration.
- Tags: Adobe After Effects, Adobe Illustrator, Adobe Photoshop, Adobe Premiere Pro, Audio Capture, Audiovisual Production, Blackmagic Davinci Resolve, Camera Configuration, Green Screen, High-Performance Recording Hardware, Lighting, Python, YouTube API

UX Designer @ [GETMORE](#) | March 2019–September 2019

- Worked as a generalist designer, creating dozens of presentations and layouts for print media and other mediums for internal and external company communication efforts.
 - Specialized in UI design, developing wireframes and prototypes of varying complexity for key client YALO, and designed email marketing layouts (Unilever, Banco next).
- Tags: Adobe Illustrator, Adobe Photoshop, Email Marketing, Figma, Google Slides, Presentation Design, Prototyping, UI Design, Wireframing
